AIR - CONDITIONING
REFRIGERATION
VENTILATION

Delta Cooling Services, is an established company specialising in the commercial refrigeration, air conditioning and ventilation needs of clients, from house air conditioning installation to multiplex supermarket installations. Using a combination of expertise in workmanship, plant design, and with more than 15 years of experience.

Delta Cooling services was founded in 2005, with an owner managed business with pride in excellent customer service. We have the capability and experience to manage big sites in an accurate and professional manner with 24hrs service and same day response call outs. We are big enough to get the job done, while small enough to maintain a high level of service and good relationships with our clients. Our client base knows we thrive ourselves in giving them an excellent service and always putting their refrigeration air conditioning and ventilation equipment first. The secret is to restore efficiency, perform upgrades and indentify break downs and repairs before they would happen.

We are focussed on technological advancement and are continually upgrading our services to offer the latest available technology.

Client base

We have previous and currently done work for Swakop Uranium, Langer heinrich Uranium, Areva resources, Nafasi water, Woerman Brock, Pick and Pay, Checkers just to name a few, of which most have an active routine monthly servicing contracts with us.

We pride ourselves with servicing, restoring efficiency, reducing running costs and reducing costly repairs.

We deliver

- Top level of service required in the field for breakdowns
- Fast project planning cycles and quick turnaround times
- Scheduled preventative maintenance servicing via contracts which also allows for discounts.
- Focused team work, a more effective service to client.
- Improved customer interaction leads to personalised service
